

Finally A Rock Solid Solution To Structural Crack Repair

The Torque Lock™ Staple is a revolutionary technique used to repair structural cracks on any solid cement based surface. Using its patented Cam Lock™ technique, it stabilizes the crack by creating up to 5,000 pounds of compression torque for each staple installed. It is the only mechanical approach to permanently repair structural cracks or fractures in any type of concrete structure.

WHAT WE OFFER

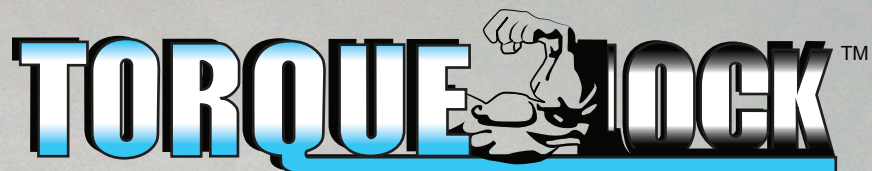

TL-10 for 10 ft. crack repair • TL-30 for 30 ft. crack repair
 TL-50 for 50 ft. crack repair • TLR-45 for radius crack repair
 TLR-90 for corner crack repair
